--> Comment Text :  
I am not in favor of Yucca Mountain for storage. We did not have enough  
hospital rooms for flu patients last year, so would  
not be able to hospitalize people for any emergency sititutation.  
Am also concerned about the water being contaminated. The roads  
in the area would not be able to carry the heavy trucks needed to  
haul the waste, and the railroad plans now are to go through  
Ash Meadows which is a wetlands habitat. I believe the states  
should consider the waste products and what to do with them before having a  
nucular power plant. I believe they should all  
be shut down and stop the waste problem, and look for solar or  
air engery for electricity. Their is enough wind in the west

and some of the eastern states to provide lots for power with  
no waste problem and would save the government a lot of money  
and problems.
